CÔTES DE BERGERAC BLANC Tutti Frutti

SOILS :

Sandy, silty clay soils

GRAPE VARIETIES :

60% sauvignon
30% sémillon
10% muscadelle

WINE MAKING :

We obtain this White Cotes de Bergerac by using white grapes which are slightly over ripe. The methods used for making this sweet white are similar to those used for a dry white: pneumatic pressing, cold settling and stabling, fermentation under controlled temperatures at less than 18 ° C then aging on fine lees with regular stirring.

For a degree in alcohol of 11.5 this wine presents nearly 40 grams of residual sugar which gives it a pleasant sweetness. This pleasure wine presents very expressive aromas of fresh fruits and a tender and acidulous taste. To appreciate all its qualities, this wine should be consumed in its youth.

PRODUCED QUANTITIES :

6500 bottles/vintage
